

MODEL S8VS SWITCHING POWER SUPPLY

EN INSTRUCTION MANUAL
DE Bedienungsanleitung
FR Manuel d'instructions

Thank you for purchasing the S8VS. This instruction Manual describes the functions, performance, and application methods required to use the S8VS.

Keep this instruction Manual close at hand and use it for reference during operation. When using S8VS-124A, S8VS-124B, S8VS-124C, S8VS-124D, S8VS-124E, read the Operation Manual together with this manual.

Hierdurch Glückwunsch zum Kauf des S8VS. Diese Bedienungsanleitung beschreibt die Funktionen, Leistungen und Anwendungsmethoden, die für den Betrieb des S8VS erforderlich sind.

Nous vous remercions d'avoir fait l'acquisition de la S8VS. Ce manuel d'instructions apporte une description des fonctions, des performances et des méthodes d'application nécessaires à son utilisation.

Key to Warning Symbols

CAUTION Indicates a potentially hazardous situation which, if avoided, reduces or eliminates the risk of personal injury or property damage.
Warning Symbols
Minor electric shock, fire, or Product failure may occasionally occur. Do not disassemble, modify, or repair the Product or touch the interior of the Product.

EN Precautions for Safe Use
(1) Installing/Lagening
(2) Internal parts may occasionally deteriorate and be broken due to adverse heat radiation depending on the mounting status.

DE MaBnahmen für die Warnhinweise
Die Last und die Leistungseinheit sind in dieser Funktionsanleitung zur Berücksichtigung der Überlastung getrennt voneinander beschrieben.

FR Guide des symboles d'avertissement
Indique les situations qui, si elles sont évitées, réduisent ou éliminent les risques de blessures corporelles ou de dommages matériels.

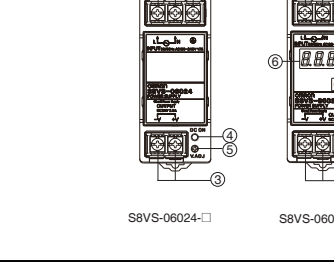

Fig. 1 Nomenclature / Bezeichnungen / Nomenclature

EN Precautions for Correct Use
Overload protection is activated if the output current rises above 105% of the rated current. When the output current returns within the rated range, overload protection is automatically cleared.

DE MaBnahmen für korrekten Anwendung
Die Last und die Leistungseinheit sind in dieser Funktionsanleitung zur Berücksichtigung der Überlastung getrennt voneinander beschrieben.

FR Precaution d'usage pour une utilisation correcte
Protection contre les surcharges
Grâce à la cellule fonctionnelle, la charge et le bloc d'alimentation sont protégés contre les surcharges.

EN Mounting
Mounting Direction
Horizontal Mounting
Other Mounting

EN Output Voltage Adjustment
Adjustable range: Adjustable with "V ADJ" (+) on the front surface of the product from -10% to +15% of the rated output voltage.

EN Overload Protection
Overload protection is activated if the output current rises above 105% of the rated current. When the output current returns within the rated range, overload protection is automatically cleared.

EN Alarm Output
Alarm output is activated when the output current rises above 105% of the rated current. When the output current returns within the rated range, alarm output is automatically cleared.

EN Short-Circuit Protection
Short-circuit protection is activated when the output current rises above 105% of the rated current. When the output current returns within the rated range, short-circuit protection is automatically cleared.

EN Parallel Operation
Parallel operation is possible when the output current rises above 105% of the rated current. When the output current returns within the rated range, parallel operation is automatically cleared.

EN Output Voltage Adjustment
Adjustable range: Adjustable with "V ADJ" (+) on the front surface of the product from -10% to +15% of the rated output voltage.

EN Overload Protection
Overload protection is activated if the output current rises above 105% of the rated current. When the output current returns within the rated range, overload protection is automatically cleared.

EN Alarm Output
Alarm output is activated when the output current rises above 105% of the rated current. When the output current returns within the rated range, alarm output is automatically cleared.

EN Short-Circuit Protection
Short-circuit protection is activated when the output current rises above 105% of the rated current. When the output current returns within the rated range, short-circuit protection is automatically cleared.

EN Parallel Operation
Parallel operation is possible when the output current rises above 105% of the rated current. When the output current returns within the rated range, parallel operation is automatically cleared.
